Draft Protocol Meeting

Notes, ... All,

Attached are the meeting notes from the 14 Feb conference call. The Menthol draft protocol (AA04271), the long-term JLI study (28123) and the upcoming Series K studies (AA02981 and AA03468) were discussed.

Mike will incorporate the suggested changes into the short term Menthol protocol and release a second draft this week. The Menthol ICF and fee will also need to be revised. Philip Morris will need to provide specific information discussed.

Nancy, Yuli and Henry,  
Please review the end of these notes for information concerning subject #23 on 28123 and units for tables and graphs.

Thanks  
Kim
